### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the claims address a method (apparatus, and computer program) for organ-specific image optimization in computed tomography where first and second CT images based on Hounsfield Units are created, an HU value frequency distribution created from the first CT image, a HU dependent transfer function created for at least one organ specific region, the first and second images are filtered using the HU dependent transfer function and mixed (independent claims 1 and 27). This feature is neither shown nor fairly suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Poole *et al.* US 6,658,080 B1 and Arnold *et al* US 4,922,915 show the creation of frequency distributions of HU values.
